

Amendments to the Claims:

This listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

1-17. (Cancelled)

18. (New) A method for converting multimedia information comprising the steps of:

- requesting multimedia information from a converter;
- receiving the multimedia information along with conversion hints;
- converting the multimedia information in accordance with the conversion hints;
 - wherein the converter is a transcoder and the converter hints are transcoding hints, and wherein the transcoder is informed of a quantization factor to use in order to achieve a desired bit rate or to re-encode at least a portion of the multimedia information at a bit rate that is a percentage of the one in which the information is initially coded; and
- providing the multimedia information to the requester.

19. (New) A method for converting multimedia information comprising the steps of:

- requesting multimedia information from a converter;
- receiving the multimedia information along with conversion hints;
 - wherein said conversion hints comprise image cropping transcoding hints selected from the group consisting of:
 - information about a desired cropping location and shape;
 - whether it is preferable to provide a full version of the image with a reduced background quality; and
 - whether it is preferable to crop the image to only contain a specific region of interest; and
- converting the multimedia information in accordance with the conversion hints;

providing the multimedia information to the requester.

20. (New) A method for converting multimedia information comprising the steps of:

requesting multimedia information from a converter;

receiving the multimedia information along with conversion hints;

wherein said conversion hints comprise video transcoding hints including a bandwidth range that represents a range in bandwidth that a video sequence can be transcoded to; and

converting the multimedia information in accordance with the conversion hints; and,

providing the multimedia information to the requester.

21. (New) A method for converting multimedia information comprising the steps of:

requesting multimedia information from a converter;

receiving the multimedia information along with conversion hints;

wherein said conversion hints comprise video transcoding hints including a computational complexity that indicates the amount of processing power that a conversion algorithm consumes; and

converting the multimedia information in accordance with the conversion hints; and,

providing the multimedia information to the requester.

22. (New) A method for converting multimedia information comprising the steps of:

requesting multimedia information from a converter;

receiving the multimedia information along with conversion hints;

wherein said conversion hints comprise video transcoding hints including a quality range that indicates a measurement of how much a peak signal to noise ratio is lowered by performing transcoding; and
converting the multimedia information in accordance with the conversion hints;
and,
providing the multimedia information to the requester.

23. (New) A method for converting multimedia information comprising the steps of:

requesting multimedia information from a converter;
receiving the multimedia information along with conversion hints;
wherein said conversion hints comprise video transcoding hints including motion vector predictors starting and ending frames for motion vector refinements; and
converting the multimedia information in accordance with the conversion hints;
and,
providing the multimedia information to the requester.

24. (New) A method for converting multimedia information comprising the steps of:

requesting multimedia information from a converter;
receiving the multimedia information along with conversion hints;
wherein said conversion hints comprise video transcoding hints relating to frame rate reduction, including identification of key frames to be excluded from being dropped; and
converting the multimedia information in accordance with the conversion hints;
and,
providing the multimedia information to the requester.

25. (New) A method for converting multimedia information comprising the steps of:

requesting multimedia information from a converter;

receiving the multimedia information along with conversion hints;

wherein said conversion hints comprise a video mixing transcoding hint associated with a portion of the video in which additional information can be displayed; and

converting the multimedia information in accordance with the conversion hints;

and,

providing the multimedia information to the requester.
